

10 KC Park Playgrounds Survey Comments November 1-30, 2021

The following comments were collected verbatim from an online survey that accompanied an interactive map. The survey was open from November 1-30, 2021.

After reviewing the proposed design of Agnes Park, please provide any feedback for the team to consider. Please be specific in your comments!

I would immediately suggest more swings. A minimum of 6 (3 for younger ages; 3 for older kids). Additionally, there should be a water fountain and sitting area for parents that accompanying their children to the park. Lighting for the park is also essential as it gets darker earlier in the Fall; Winter months. Lastly, a trash can on site will be helpful for those bringing snacks to the park with them.

After reviewing the proposed design of Arno Park, please provide any feedback for the team to consider. Please be specific in your comments!

Removing the current playset doesn't seem necessary; furthermore the proposed location of the new one is in the spot many families, kids and sports teams use as a field. If tearing down old playset put new one in its place.

After reviewing the proposed design of Carl Migliazzo Park, please provide any feedback for the team to consider. Please be specific in your comments!

Doesn't seem necessary and seems kinda minimalist compared to the other park designs. Landscaping, pavement; lighting improvements are more necessary and desired by neighborhood.

Please add a slide!

After reviewing the proposed design of North Hampton Park, please provide any feedback for the team to consider. Please be specific in your comments!

I like the design for little kids. Please consider some options for older kids. Basketball hoops, tether balls, gaga ball pits. A small shelter house with a BBQ grill would also be great.

After reviewing the proposed design of Observation Park, please provide any feedback for the team to consider. Please be specific in your comments!

After viewing all the park proposed design as a lifelong resident of the Westside I feel our park deserves the same quality and equipment given to the other parks. I ask you redesign the proposal with the same enthusiasm shown to the other parks.

Compared to the other playgrounds the one the Westside community is supposed to receive has a noticeable size difference to the others. The Westside community is alive and well with many children in our community. We understand and see the changes of gentrification. We understand the trying to

appeal to new residents. We are still a community with many young children, and this playground is not sufficient for them. We have the space, and our children deserve better.

The park could definitely be updated, but making it smaller is not a good idea. Give our kids more to do at the park and more playing area! Make it bigger and utilize the full playground, with More than 2 slides and more swing sets!

This is smaller park area than we have now and we have plenty of neighborhood children who play/use this area.

Too small. Once again this neighborhood is getting the short of of the stick. Many kids use this park. The kids park that is being used as justification for this design. Is not open to public. We do not have access to that. If tbis cant be made better and a comparable size, leave it alone.

The current playground is larger and has 3 slides. Tbis js being reduced down to one slide and less swings. The westside consistently gets less. For example, our pool doesnt even have a pump. Agnes and Bent park seem to have the playgrounds that would best fit playgrounds that would work at Observation. There are a lot of kids who play there because pf surrounding apartments

This does not aim towards the much smaller children in the neighborhoods. Ideally a playground similar to Agnes park and Bent tree park would best fit our area.

This is smaller park area than we have now and we have plenty of neighborhood children who play/use this area.

The downsizing is unbelievable. This seems to be accommodating the “newer” tenants in the neighborhood who typically stay for 2-3 years before moving back to the suburbs. The children of this neighborhood deserve more than what this is giving. More slides; swings please.

After reviewing the proposed design of Bent Tree Park, please provide any feedback for the team to consider. Please be specific in your comments!
